

Exercise 1

For the HTML and corresponding screenshot given below, write JavaScript code to implement the functionality of the two buttons to change the quantity. The quantity should lie in the range 0 to 10. Add properties to existing elements as required.

Quantity: 0

```
<html>
  <body>
    <h3>Quantity: <span>2</span></h3>
    <button>+</button><button>-</button>
  </body>
</html>
```

Exercise 2

Given a list as follows containing subject names, do the following:

- a. Add a new subject “AFL” below WT
- b. Replace “Maths” with a new list item “MCSE”

Use only DOM manipulation methods.

- Maths
- WT
- DDCO
- DSA

Exercise 3

Create a Promise that checks if the current date is an ODD number, resolves the promise with a text result “It is an ODD Day”. If not, it rejects the promise with the reason “It has EVEN out”. The status of the promise is fetched when the user clicks on the “Check” button and the result is shown in a “p” element.

Ex. Current date => 17/09/2025

Result => It is an ODD Day

Current Date => 18/09/2025

Result => It has EVEN out
